Senior-Lead Designer / Front-End Web Developer / UI-UX Designer

Professional **Web and Mobile UI/UX designer and developer** with 9 years of experience. Using the latest web technologies; specializing in developing clean, complex, intuitive *cross-browser / Multi-device web interfaces with subtle and complementary animations and visual effects*.

Creative and highly skilled professional hands-on front-end developer with a superb track record of managing *multiple complex design and development projects in various environments*. Able to manage stakeholder expectations and willing to take full responsibility for the delivering of project objectives. Creating visual design, animation and effects that are unique and trend setting in the market.

Chandra is an easy going individual who enjoys new challenges and developing his skills with the latest technology. He has a holistic understanding of internet technologies from design, development and search engine optimization requirements and he *creates value to the overall go-to market objectives*.

Work Experience

Cynopsis-Solutions Pte Ltd (Singapore)

UI / UX Front-End Web Developer

20-05-2015 - Present (7 Months)

As part of a medium development team, I have primarily been responsible for the development of new Python projects using Django open source framework, CodeIgniter, as well as maintaining a number of legacy Web2py websites for our clients.

The biggest project was Artemis, iRis an Anti Money Laundering site with approximately 72 modules. I led the development effort in migrating our older Java-based websites to Python and Django with more interactive for clients, as well as maintaining a web2p sites. Worked with clients within Singapore.

Key Achievements:

- ❖ Developed prototype concepts using Axure, Photoshop, and Illustrator concept designs
- ❖ Integrated responsive UI designs into Django framework for web and mobile using HTML5, CSS3 and jQuery / JavaScript
- ❖ Created Artemis, iRis, a custom functionality built using Django, with jQuery AJAX, AngularJS components. Also designed from the start with SEO in mind.
- ❖ Developed Application to assess JSON and XML from Restful web service from consumer side using JavaScript and AngularJS
- ❖ Developed the front-end web page by using HTML5, CSS3, and JavaScript, taking advantage of the frameworks AngularJS and Django
- ❖ Maintained Python/SQL (Django) projects, Communicating and interfacing with previous developers on a regular basis.
- ❖ Made heavy use of Chrome Developer Tools + Firebug to ensure front-end code and assets were optimized and high-quality
- ❖ Used Responsive Web Design templates to meet cutting-edge technology requirements

Tools and Technologies: Adobe Photoshop, Bootstrap, HTML5, CSS3, Javascript, Ajax, JQuery, AngularJS, Django, Git, Nginx, Python
